- Completed all Google Analytics Academy courses

WORK EXPERIENCE

University of Central Florida Information Technology

October 2019 – Present (Remote)

IT Client Support

- Manage IT support requests by evaluating problems and developing novel and timely solutions for non-technical staff
- Responsible for daily database administration tasks that require high attention to detail

PROJECTS

Amazon Review Data Analytics with R

- Used R to generate statistical data on a database populated with reviews from Amazon
- Created 2D representations of the result data

SQL Database for Shipping Backend

- Created, validated, and managed multiple tables that contained sample information for user accounts and shipping data of an international business using Microsoft SQL Server
- Applied good database management policies I learned through my continuing education courses
